Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1- 24, drawn to an apparatus for forming relief in a surface of a sheet, classified in class 101, subclass 3.1.

II. Claims 25-30 drawn to a method for forming relief in a surface of a thermoplastic sheet, classified in class 101, subclass 32.

Inventions of Group I and Group II are related as an apparatus and a process for its practice. The inventions are distinct if it can be shown that either: (1) the apparatus as claimed can be used to practice another and materially different process. or (2) the process as claimed can be practiced by another materially different apparatus or by hand, (MPEP § 806.05(e)). In this case apparatus can be used to make a vinyl tile or a printing plate, or the process can be practiced by another materially different apparatus such as a punch press or by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2854

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
